Quality, skilled heathcare stands the test of time.

South Haven Health System. Serving our communities in southwest Michigan for over 100 years.

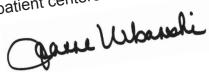

Dear South Haven Area Residents and Visitors:

Providing health care is a joint effort not only within our facility, but beyond our walls as well. South Haven Health System (SHHS) partners with other professionals to offer you a seamless continuum of care.

Within the walls of SHHS, in addition to our highly qualified staff of professionals that care for you, are Hospitalists who are a part of the Bronson Healthcare Group that care for those that are admitted to SHHS, a Radiologist who is part of Advanced Radiology Services, a group of 115 Radiologists that cover most of West Michigan, and a Pathologist who provides services at Lakeland Regional Health System as well as SHHS. A joint effort, working together to coordinate your care from diagnosis to treatment and beyond.

Not every health care facility is fully equipped to handle every injury and illness. Some specialize in one disease. SHHS provides the people of our communities a full spectrum of general health care including sophisticated tests. For those specialized needs that we do not provide, we will assist you with a smooth transfer of care to ensure you receive the continued care you deserve. You can start your care here and we will assist you in navigating the complexities of the health care system. By doing so, any specialist you need to see may then report back to your primary provider right here.

In a joint effort, SHHS continues to improve the health and wellness of the people we serve by partnering with other health care professionals to provide patient centered care.

Joanne Urbanski President / CEO South Haven Health System
